System Highlights

Powerful, Detailed, Automatic Quotation Module

- Automatically calculate price in details, such as number of Make Ready, Impression, Over Run, Ink Coverage, etc.
- Self define all basic cost and profit.
- Automatic calculate running methods base on all sizes of paper for “Sheet Wise”, “Work & Turn” or “Work & Tumble”
- Direct email quotation to customer in PDF format.
- Flexible discount adjustment for final prices.

Quotation Template for quick quote and promotions

- For frequently asked quotations or some promotion products, can be saved as a template; when customer want to quote a similar printing job, just quickly select the template and save as a new quotation.

Automatic Generate Paper PO Base on Sales Order

- System will generate material requirement list from sales order everyday, such as paper purchase, etc.

Easy Buy out Management

- System will generate buy out form automatically base on Quotation.

Bar Code Driven for Job Scheduling and Tracking

- Easy Job Ticket scheduling and tracking for production manager
- Automatically job schedule calculation. Display working hours and estimate start times for each job.
- Bar code driven Job Ticket statues tracking. It saves time and minimizes human error.

Real Time Customer Credit Control

- Posting customer Sales Order base on the current credit amount of the customer. It maximizes the limit to avoid the past due amount.

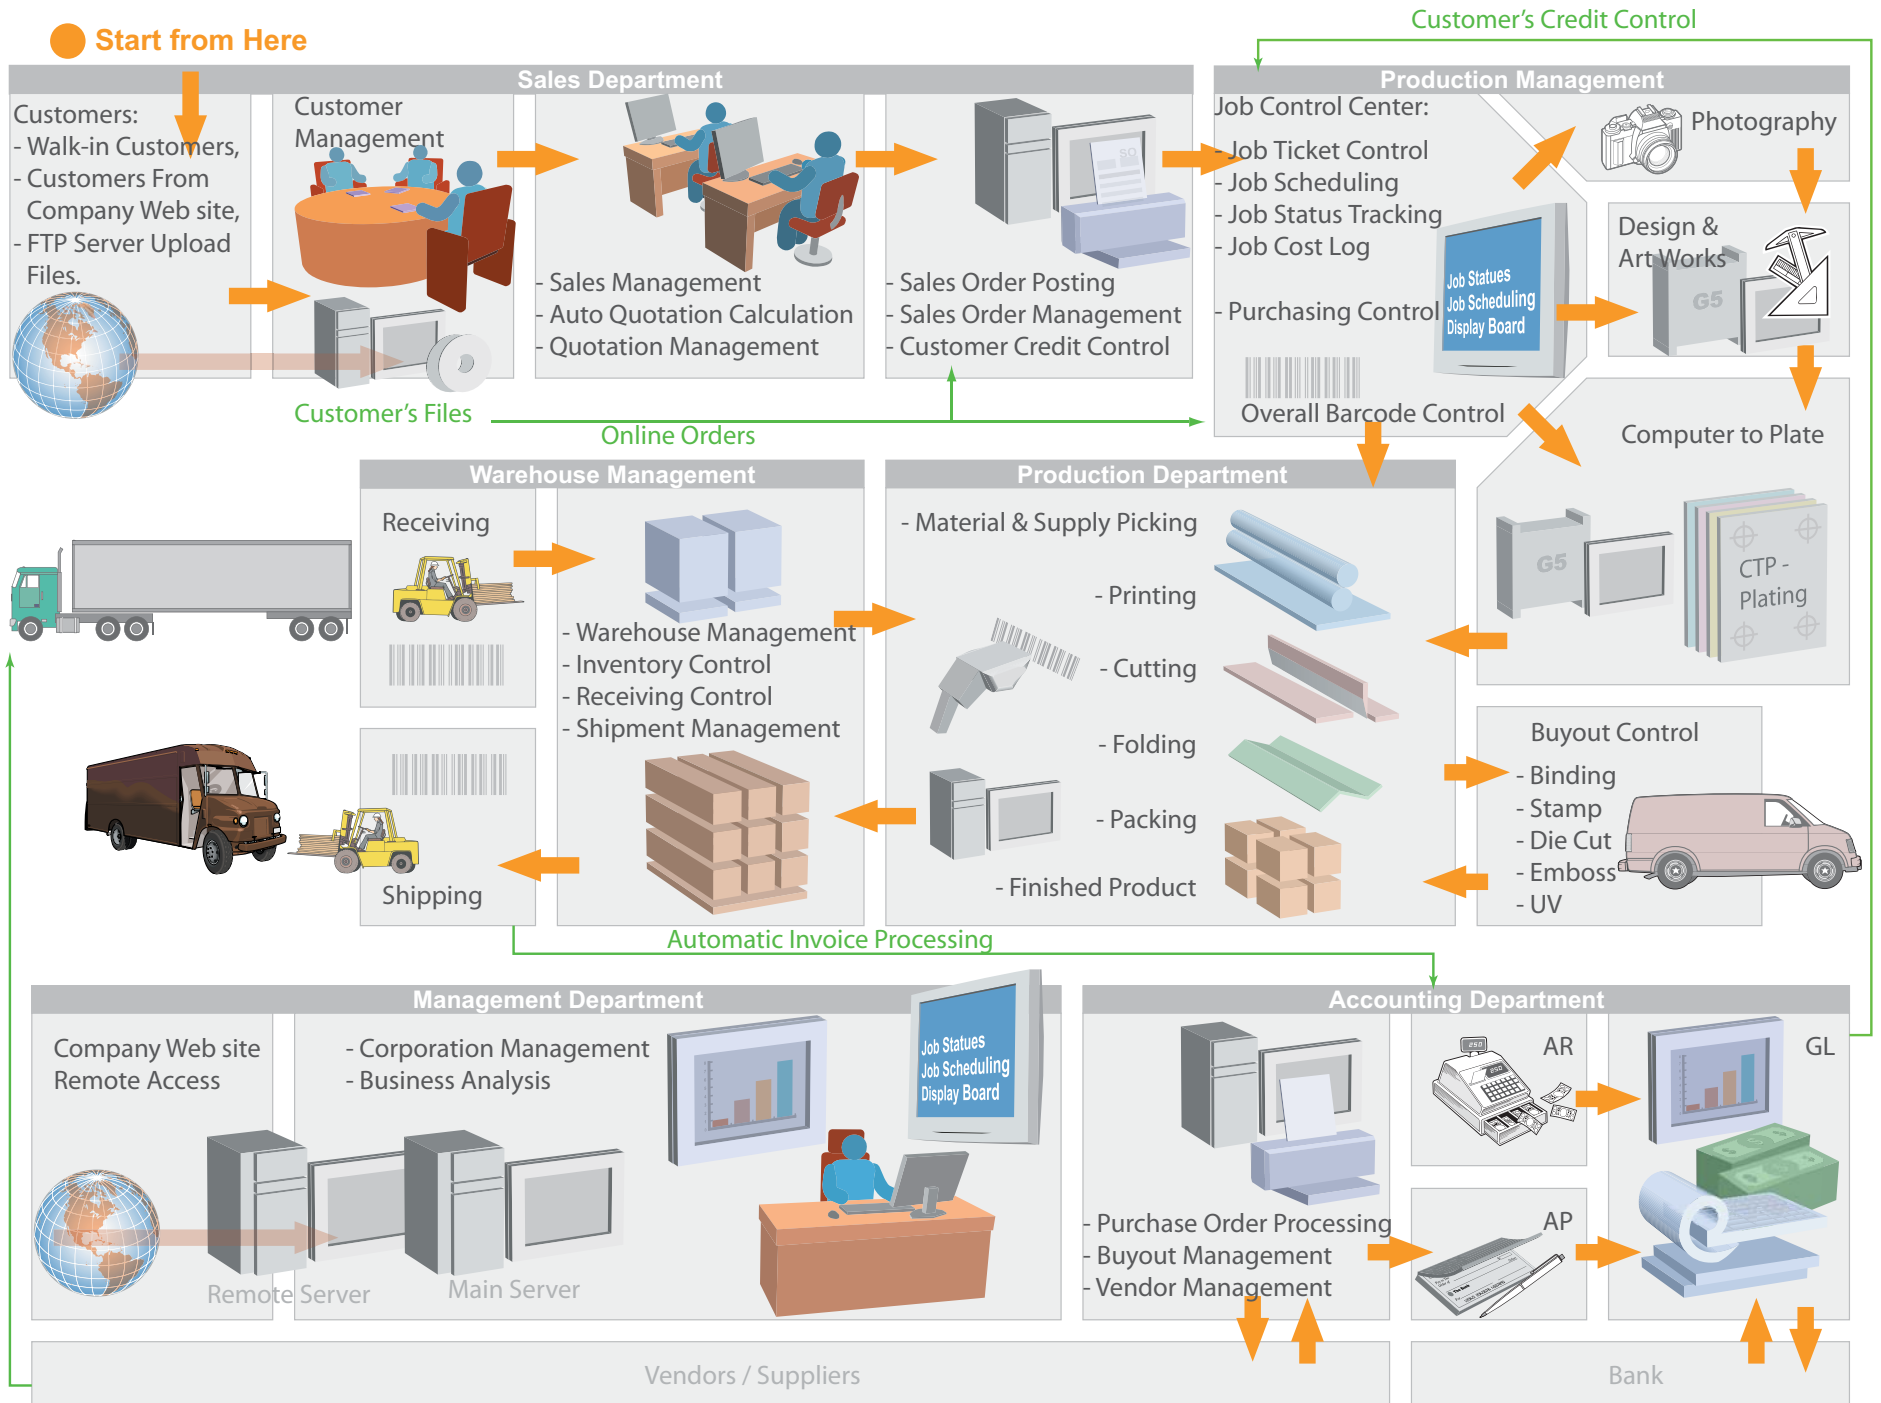

Complete system for overall enterprise management

- 9 modules cover all from the quotation, production, shipping, customer management, sales management, accounting, etc.
- Ready for on-line processing, such as remote management, on-line quotation and sales.
